

Dry Eyes? We Can Help...

Having dry eyes is one of the most common and frustrating conditions a person can experience.

As we begin to age, we tend to produce less tears. The natural tears that we produce tend to be of less quality as compared to the tears our body created when we were younger.

If you suffer from dry eye, or eyes that tear excessively, a comprehensive evaluation may be your best first step towards enjoying greater comfort and clearer vision.

Symptoms May Include:

- * Stinging, burning, dry or scratchy eyes
- * Excessive Tearing
- * Redness
- * Sensitivity to light
- * Blurred vision
- * An inability to comfortably wear contact lenses
- * Tired eyes
